We are proud of the products we've introduced throughout the years, and we're thankful for our loyal customers' continued support.

In late 1999 we moved into our new 32,000 square foot facility in Phoenix, Arizona. It houses the latest in research and development equipment, manufacturing machinery and technology focusing on developing and manufacturing piston rings for any and all applications.

Our rings continue to show up on the world's fastest, from Winston Cup to IMCA to IRL, from marine to drag racing, oval track to off road - nobody builds piston rings that seal better than Total Seal.
