We're happy to announce the Race engine technology mag will be staying with the team for 2011.

Chris Perry says " we are pleased to be continuing with Andy and the team. We feel there's a synergy between a race technology mag and a technological race team!"

We thank Chris and the race technology mag for their support.

Race Engine Tech are kindly offering all our supporters and fans a discount on a yearly subscription of their mag. The discount code is **redvictor1** and anyone using it will get a 10% discount of their order!

Just pop along to <http://www.highpowermedia.com/> and get yourself a very good read every month. It's not our bag particularly but this month there's a very detailed write up and technical spec of the current F1 Toyota engine. A must for any of you tech freaks of the F1 sport..

Check that out here <http://www.highpowermedia.com/mall/productpage.cfm/RET/2050/352560>

It wouldn't surprise me if Ron Dennis was using the promo code as we speak..he he.
