As an official technical product supplier to the Red Victor Racing Team, Scattergood & Johnson Ltd are proud to use their expertise to help support Andy and Red Victor 3.

Established in 1899, "Scatts" has always aimed to help its customers meet the highest standards of quality and reliability, no matter what their application. Supporting Andy at the build stage, and in the running of Red Victor 3, is a challenge we are pleased to be able to undertake.

Stocking over 40,000 product lines covering electrical and fluid control components, not only can Scatts help you deal with all manner of technical and industrial design issues, but we can ensure that you get the components you need, when you need them.

Based in Leeds, but with branches and sales engineers nationwide, Scattergood & Johnson Ltd are more than just a long established distributor. Our technical specialists and in-house engineers can supply the most popular parts right through to bespoke components backed with expert advice.

Whether you're interested in automation, Ex approved components, motor control gear, safety, sensing or switching products, Scatts will be able to help you find the solution you need.

Team principal Andy Frost says "We were involved with Scatts on Red Victor 2 and had great results with their products. Naturally we approached them again for Red Victor 3. Having high quality, accurate sensors to collect the correct data is critical. Without that data it is very difficult to move forwards with performance. We are very happy to use Scatts products and technical expertise and are looking forward to working with them when the car is at the running stage."

If you're interested in finding out how Scatts can help support your electrical and fluid control requirements, Tel: 0113 243 0203 or visit www.scatts.co.uk .
