The team is proud to announce that CAM Auto Developments will continue to be a technical partner for the 2011 MSA pro modified race season.

CAM Auto Developments, the UK's largest Goodridge distributor, will be expanding their support to be an exclusive supplier of all the fluid transfer components from the Goodridge hose range on Red Victor 3.

Team Principal Andy Frost says "We have worked with Ian Goldie from CAM Auto for a number of years and attribute part of our previous success to their technical support. We are very happy to be using the Goodridge range of lightweight hoses and ends, as their performance and safety are unmatched in the racing world. We thank Ian for his foresight for choosing the official VXR drag race team to showcase his product range"

Managing director of CAM Auto Ian Goldie says " We're delighted to be involved with the new Red Victor 3 project. I feel the new car will showcase our products as much, if not more than the previous car. We're looking forward to the 2011 MSA pro modified season to see how RV3 shapes up."

To view CAM Auto's extensive range of Goodridge hoses, or to see their other product range visit them at www.camauto.com
