The 'sparks' are really flying now, as we are proud to welcome Magnecor as our ignition lead supplier, along with their technical backup and advice to the team.

Team principal Andy Frost says "We used their excellent KV85 8.5mm Competition leads on RV2 and had no heat or reliability issues whatsoever. We are very happy that Magnecor are not only supplying their top cable, but are giving us technical support on the ignition aspects of the project.

One of the critical things with high boost, turbo methanol engines is spark 'blowout'. With Magnecor involved the team, the job has become a lot easier."

Phil de Wit, managing director of Magnecor says " We are really excited to be working on the VXR/ Red Victor 3 project, as there is nothing like a challenge on the technical side and to having a 'presence', with such a professional outfit as Andy's".

The team are really looking forward to working with Phil and Magnecor in the upcoming 2011 MSA pro modified season. You can check out Magnecor's product line at www.magnecor.co.uk
