We are happy to announce that Hi spec motorsport are to become technical partners to the Official VXR drag race team in 2011.

Team principal Andy Frost says " We are really pleased that Hi-Spec have joined the team for the 2011 season. We used Hi-Spec brake discs and calipers on RV2 with great success, particularly as we were able to stop a 1550kg car without a parachute from 200+mph! We're really happy to be using their new R126 6 pot caliper and new modular handbrake caliper on RV3. Having confidence with the braking system is paramount and we're more than happy to be using Hi-Spec for our braking needs once again"

Geoff at Hispec says; "We are very happy to be involved once again with the highly professional Red Victor 1 racing Team

Following on from Red Victor 2's success over the last few years, we are glad to be given the opportunity to prove

and develop our braking systems on such a high performance vehicle.

Red Victor 3 will show just what Hispec Brakes are capable of "

We thank Hi-Spec for their foresight in choosing our team to display their products and look forward to working with them in regards to the braking system.

You can visit their website at www.hispecmotorsport.co.uk or call Roy on 01322 286850 to discuss your requirements.
