We are now authorised dealers in the West Midlands for the full range of VP race fuels. We can supply everything from 100 octane Street blaze to M1/M3/M5 methanol, and everything inbetween. RV3 exclusively uses VP Street blaze 100 on the street, and VP M1 methanol for racing. Whether you drag race, drift, circuit race, motocross or do pretty much any racing we can supply what you need !

We are also authorised dealers for the full range of Red Line racing products. RV3 uses Red Line 15W-50 engine oil, Red Line racing ATF, Red Line axle oil and Red Line CV grease to make sure everything works as it should on the street and track.

We always insist on our transmission customers using Red Line racing ATF in their transmissions, and VP racing fuel for their engines ! Please visit the [Penn Autos page](#) or call us on 01902 344004 for further details on both products and their availability.
