To all of our customers in 2011 who either won championships or set PB's.

We are proud to say that everyone who took delivery of a transmission or converter from us went faster than they did before, with more consistency, and with no breakage!

Ask around the track and you'll find our after sale service is the best you can get, because we want everyone to have a happy experience with our transmissions.

Every racing transmission is custom built to your combo, wether that is N/A, nitrous, supercharger or turbo. No generic transmissions here!

If you'd like to join the growing list of people who go fast with our transmission/converter combo, or just need a quality rebuild of your std auto trans, don't delay! Give Frosty a call on 01902 344004 to discuss your requirements.

And as a heads up, please don't leave it until just before next season. Frosty builds ALL the racing transmissions, no one else. Each transmission takes at least 3 days to build, so he can only do so many. An early call means you won't be rushing a week before that first meeting of the year.

Looking forward to helping you get a winning habit....

The Penn Autos team.
