

PRECISION TURBO AND ENGINE will be partnering with Andy Frost and the VXR team for the 2013 European racing season. Acting as a turbocharger source and supplier, Precision's partnership with Frost is an official continuation of the previous collaboration between the two entities.

Driving his iconic red Vauxhall Victor, known as the Red Victor 3, Frost's previous successes include claiming the title of the world's quickest and fastest street legal car in the quarter mile, having gone 6.59 at 220 MPH. For the 2013 season, Frost aims at bettering both of those numbers and will also compete in the FIA European Pro Modified class. Precision is proud to be working with Frost and the VXR team and is looking forward to a great year.

About Precision Turbo and Engine, Inc.

Since 1987, Precision Turbo and Engine has been a leader in turbocharger technology for street and race applications. PTE offers a complete line of replacement, upgrade and custom turbochargers featuring the exclusive CEA® (Competition Engineered Aerodynamics) compressor and turbine wheels.

Additionally, PTE manufactures its own line of intercoolers, boost control products, electronic fuel injectors, and is a top distributor for stand-alone engine management systems and fuel system components. Each sale comes with expert advice and support.
