The Red Victor Racing Team are very proud to announce that Goodridge are committed to supporting the team again in 2014!

Andy Frost, team principal says, "After our record breaking year in 2013, we are very happy to have Goodridge on the team again for 2014! We rely exclusively on their 910 lightweight hose and fittings, and have been very happy with the way they performed under the incredible pressure and heat that RV3 produces on the track. Their products also performed admirably on the road too!

We thank Martin and the team at Goodridge for their awesome products and support".

Martin Taylor, Product Marketing Manager from Goodridge is happily supporting the Red Victor Racing Team for its second year running not only for its obvious 1/4 mile achievements, but also due to the fact it shows what top quality engineering can do with top quality products!
May I wish Andy and the team all the best for 2014!

Goodridge to support RV1 racing on 2014.
