Great news today. The RV racing team are proud to announce that Lamude Racing Engines are once again supporting our engine development program in 2014!

For 3 years we have relied on Lamude Racing to build the engine to break the street legal world record on numerous occasions, and driven on the street with it too!

Look out for more records in 2014, and more street driving!

The team thanks Marc Lamude for his incredible support, and of course his dedication to our engine program, and of course his superb engine building skills.
