The team are very proud to announce the ongoing support from Webster Race Engineering in 2014.

Team principal and owner Andy Frost says “ Most people know the WRE built the rolling chassis on RV3, and that it goes arrow straight. This is down to the tremendous knowledge that Jon Webster and the team have. We are very happy to continue the working relationship that we have had since 2002, when Jon turned Red Victor 2 into a S/E contending car. Since then we have set records in everything we have done. We look forward to continuing that during 2014, and are eagerly awaiting the updates to the car to see what it will do performance and driveability wise..

We thank Jon for his excellent support on and off the track! “

Jon Webster, head honcho of WRE says” Andy's drive and determination to achieve the goals he has set for himself and the team is inspirational, and is a great example of what can be achieved. I don't know anyone who works harder.

Andy and I have a long standing working relationship, with an understanding of the importance

of R and D procedures. The feed back and data we get back from Andy is invaluable to verifying one way or another the theory behind changes and modifications. With this in mind Webster Race Engineering will continuing to provide track and technical support throughout 2014, and we wish the RV3 team the best of luck for the season.”
