The Red Victor Racing team are proud to announce that Precision Turbo and Engine are supporting the team again for 2014.

Andy Frost, team principal, driver and owner of the team says” The team are very happy that Precision Turbo want to be involved with us for the second year running. Their GEN2 Pro Mod 91mm turbos are without doubt one of the key things that helped the team reset the world record 4 times in 2013. It’s very satisfying to know we have the world’s greatest turbo company on our side, and we look forward to working with them to set more records in 2014”

Precision Turbo and Engine representative says “We are looking forward to working with Andy Frost and the Red Victor team in 2014. It’s an honor to have our turbos on board the world’s quickest and fastest street legal car, and are expecting to see even quicker ET’s and faster MPH’s this year.”

The team thank Precision Turbo for their support, and we can’t wait to see what the 2014 season will bring for Precision and ourselves!
