Red Victor 1 Racing to partner with R-Tech Welding Equipment.

The Red Victor racing team are proud to announce a partnership with R-Tech Welding Equipment for the trip to Bahrain for the world record attempt, to be the worlds quickest and fastest street legal car over a 1/4 mile, and beyond.

Andy Frost, team principal of RV1 racing says "We are proud to have the chance to promote R-Tech's products on RV3. They have a great line up of welders and welding equipment that we are happy to showcase, and are looking forward to working with them now, and in the future"

R-Tech Welding Equipment is a family run UK based supplier of welding equipment. They supply their own range of TIG, MIG and Arc welders and Plasma Cutters all with their two year collect and return warranty. Customer satisfaction is paramount to R-Tech Welding Equipment and their pre-sale advice and post-sale care is what sets them apart.

Jeanette Carr, marketing executive at R-Tech Welding Equipment says "We are proud and excited to be working with Red Victor 1 Racing. Andy and his team approached us for support in getting the car to Bahrain for the world record attempt and regaining the title. The level of dedication that they have is nothing less than inspirational. We look forward to working with them."

Robert White, managing director says "This is a very exciting partnership for us all, we supply many motorsport companies and enthusiasts and at R-Tech we all have a very keen interest in motorsport ourselves, I look forward to Red Victor Racing breaking the record again and wish them great success in Bahrain"

We thank R-Tech for having faith in our team, and wanting to be part of our record breaking attempts. And we look forward to them being on the car when we attempt the record!
