---

Well, we've actually got to the dyno on time. After a huge amount of work over the past couple of months finally it's all come together. Massive thanks go to Nigel Colwell at [www.altiss.com](http://www.altiss.com) for his superb fabrication work, [JWRE](#) for their technical advice and quality parts, [Knight Racing services](#) the top notch engine parts and dyno services, Steve Clark at [Nimbus motorsports](#) for the DEI and Thermotec heat management products and Torco oil and Steve Szczpanski for coming to the UK twice to support his Electromotive product. Also special thanks to Malcolm at Knight racing services for all the technical help to fit the engine on the dyno this weekend. I'll keep you posted on the results when we have them.....
