good news.....

at last some good news. Almost all of the parts are here thanks to Pete at Knight racing services. Tim (Jacko) Jackson has been measuring the rods so we can get the right clearances before laying the crank in the block. Pete has been running around getting the balancing done and I have been running between Wolverhampton, Leicester and Daventry getting the heads sorted for skimming. Thanks to Nigel at Altiss for sorting the pushrod holes out before taking them to Knight engine services for the machining.

Pete has also allowed us the use of his engine building facility for the weekend and Tim is giving up a weekend to help build the engine. A huge thanks to those guys.....

Secondly the team have signed a 2 year sponsor deal with Kustom Konsulting Ltd. (KKL) We thank Rob for supporting our team and are looking forward to working with his company.

The company was first established January 2005 by owner and director Rob Inglis following several years spent working as a drilling consultant for the Landmark Graphics Corporation division of Halliburton. Offering bespoke consultancy, training and delivery services in the oil industry, KKL has continued to grow and thrive since inception and has carried out successful projects for many oil majors in countries across the globe. Full UK and Norway offshore safety and medical certification, first aid, firefighting and H2S training means that assistance and expertise can be provided directly on the wellsite, reducing lost time and drilling operational costs where they matter the most. Experts in DIMS and its replacement OpenWells and EDM data management software systems as well as modern real-time data transmission technologies such as WITSML, KKL can undertake any challenge to improve and integrate drilling computing technologies within any size of drilling operation. To discuss requirements or for more information contact KKL on +44 (0)1358 725814 or on [:sales@kustomkonsulting.plus.com](mailto:sales@kustomkonsulting.plus.com)
