The car ran 223mph today at Bruntingthorpe proving grounds. Surface was very slippery and i left 330ft of tyre tracks, also no more than 1/3 throttle for the whole run. The speed was attained in less than 1/2 a mile... I was very surprised how good the car felt at that speed and i was pleased that none of the bodywork/trim fell off! Look out for the full feature in Retro cars magazine soon.... Thanks to Nigel who took the day off to crew and Matt, Simon and Mark from Retro Cars mag.
